## Equipment

- Stand mixer or electric hand mixer
- Mixing Bowls
- Cake pan

## Ingredients

- 2 cups mashed ripe bananas about 4 bananas (466 grams)
- ½ cup whole milk room temperature (120 ml)
- 1 tablespoon lemon juice
- 3 ½ cups all-purpose flour (420g)
- 1 teaspoon ground cinnamon
- 1 ¼ teaspoons baking soda
- 1 teaspoon kosher salt
- 1 cup unsalted butter softened (227g)
- 1 ½ cups granulated sugar (~~300g~~) 280g
- 1 cup light brown sugar 220g 200g
- 4 large eggs room temperature
- 1 tablespoon vanilla extract

## For the Cream Cheese Frosting

- 1 block cream cheese (8-ounce/227g)
- ½ cup unsalted butter softened (113g)

- 2 teaspoons vanilla extract
- 4 ½ cups confectioners' sugar (540g) 525

## Instructions

### For the Cake:

1. Preheat the oven to 350°F. Spray a 13x9-inch cake pan with baking spray with flour.
2. In a small mixing bowl, whisk together the bananas, milk, and lemon juice. In a medium bowl, whisk together flour, cinnamon, baking soda, and salt.
3. In the bowl of a stand mixture with a paddle attachment, add the butter and sugars. Beat on medium-high speed until light and fluffy, about 3 to 4 minutes. Reduce the speed to medium. Add the eggs, one at a time, beating until completely combined before adding the next. Stop and scrape down the bowl occasionally. Beat in the vanilla.
4. With the mixer on low, add the flour mixture alternating with the banana mixture, just until incorporated. Pour the batter into the prepared baking pan.
5. Bake for 55 to 60 minutes or until a wooden pick inserted into the center of the cake comes out clean. Place on a wire cooling rack and let cool completely in the pan.

### For the Cream Cheese Frosting.

1. In the bowl of a stand mixer fitted with a paddle attachment, add the cream cheese and butter. Beat on medium speed until smooth and creamy, about 2 minutes, scraping down the bowl as necessary. Add the vanilla and beat on medium until combined. With the mixer on medium-low, gradually add the confectioners' sugar. Once fully incorporated, scrape down the bowl and beat again until fluffy, about 1 minute. Spread frosting over the top of the cooled cake. Store any leftovers covered and refrigerated for up to 4 days.

## Notes

- A scale to measure your flour is highly recommended for the most accurate results. However, if you don't have a scale, fluff your flour with a spoon and then spoon it into your cups before leveling it off with a knife. This method is the best way to measure flour without overpacking the measuring cup, leading to a heavy banana cake.
- Tap the cake pan on the counter a few times to pop any air bubbles and level out the batter in the pan for an even bake.
- For the eggs to easily incorporate evenly into your batter without overmixing, bring them to room temperature beforehand. If you forgot to take your eggs out of the fridge ahead of time, you could quickly bring them to room temperature by placing them in a large bowl and covering them with warm tap water for 5 minutes.
- An offset spatula is perfect for frosting the cake.
