

SAMIN NOSRAT'S
Ligurian Focaccia

SALT FAT ACID HEAT

INGREDIENTS

For the dough:

- 2 1/2 cups lukewarm water
- 1/2 teaspoon active dry yeast
- 2 1/2 teaspoons honey
- 5 1/3 cups all-purpose flour
- 2 tablespoons Diamond Crystal kosher salt, or 1 tablespoon fine sea salt
- 1/4 cup extra-virgin olive oil, plus more for the pan and finishing
- Flaky salt, for finishing

For the brine:

- 1 1/2 teaspoons Diamond Crystal kosher salt
- 1/3 cup lukewarm water

INSTRUCTIONS

- 1 In a medium bowl, stir together water, yeast, and honey to dissolve. In a very large bowl, whisk flour and salt together to combine and then add yeast mixture and olive oil. Stir with a rubber spatula until just incorporated, then scrape the sides of the bowl clean and cover with plastic wrap. Leave out at room temperature to ferment for 12 to 14 hours until at least doubled in volume. *- grows a lot*
- 2 Spread 2 to 3 tablespoons oil evenly onto a 18-by-13 inch rimmed baking sheet. When dough is ready, use a spatula or your hand to release it from the sides of the bowl and fold it onto itself gently, then pour out onto pan. Pour an additional 2 tablespoons of olive oil over dough and gently spread across. Gently stretch the dough to the edge of the sheet by placing your hands underneath and pulling outward. The dough will shrink a bit, so repeat stretching once or twice over the course of 30 minutes to ensure dough remains stretched.
- 3 Dimple the dough by pressing the pads of your first three fingers in at an angle. Make the brine by stirring together salt and water until salt is dissolved. Pour the brine over the dough to fill dimples. Set the focaccia aside to rise for 45 minutes until the dough is light and bubbly.
- 4 Thirty minutes into this final proof, adjust rack to center position and a second rack to the upper position. Preheat oven to 450°F. If you have a baking stone, place it on the center rack. Otherwise, invert another sturdy
